

Wege zum Frieden November 2019 – Statement

Stop Violence!

Get back to where you have begun: No violence!

- And less people will die.

What remains from the anglophone community and its roots, when humans (military/ambas/fake ambas) are draining the region?

What remains from this people, when the economy and the infrastructure continue to be destroyed?

How will a society look like, when for years they only know the force of weapons and the thoughts about fleeing and taking refuge?

Fake ambaboy or not, isn't it a sign of the loss of control if the forces which are supported by the diaspora can not be kept in integrity? When there is violence against civilians just to make money?

Let's get the struggle to Europe where it belongs to. Here we can fight with democratic weapons, and we do not have to die for it. Let us stop colonisation. Let us look for a matter to stop the western world to keep on financing and supporting the dictator of Cameroon.

Let us stand up here in Europe and everywhere against the killing of innocent citizens in Southwest and Northwest region by military.

Let us stand up for an honest dialog between the government and the separatists.

Initiate process to return to normality of the daily activities of the people in Southwest and Northwest Regions.

Pave the way to school return in the war zone for children and students of universities

We need objective reports about the situation in the war region.

Next meetings: 26.-28.6.2020 and 9.-11.10.2020
